Rugged and durable winter glove that protects against cold and wet.

With hardwearing synthetic leather in the palm and reinforcements, it is a glove that lasts.

The glove is watertight and equipped with a ventilating membrane laminated with the lining, which provides stability in the grip.

Special attachment points at the fingertips and side seams stops lining and membrane from sliding out.

Extra Thinsulate lining in back of the hand gives a warm and flexible glove with good fingertip feeling, suitable for down to -15 degrees.

Open cuff with elastic makes the glove comfortable and easy to put on and take off.

Reflective details in collar and on back of the hand for increased visibility.

Suitable for building and construction outdoors, in cold environments.
