DESCRIPTION OF THE CONCEPT (max. 2 pages)

- *Provide a detailed description of the technology/concept.*
- *Which demand-driven challenge within the sector does this technology address?*
- *Is the technology already market-ready? Please describe the current status of the technology.*
- *Is the technology already being applied in pilot installations, demonstrations, or commercial operations? If yes, please specify where these installations are operational.*
- *Provide an indication of the cost of the technology.*
- *What are the innovative aspects of the technology?*
- *Describe the sustainability benefits of the technology.*
- *Is the technology applicable in Flanders? (Taking into account legal aspects, the regional context, etc.)*
- *Which partners have been involved in the development of this concept?*
- *Please provide any links to additional information about the organization/institution and/or the concept.*

Statement:

I hereby declare that the information provided in the application has been completed truthfully and that I carried out the research myself.

I am prepared to present the project orally to the jury and, in the event of a nomination, to explain the project at the awards ceremony following the annual general meeting at the end of May 2027. This will take place in Flanders. Subject to prior agreement, the nominee's pitch may also take place online.

I agree that the proposed project may be publicised in the media, via the VCM website and VCM newsletter, at VCM study days, via the media channels of VCM members, at study days organised by De Mestverwerkers, and in the newsletter and other communication channels of De Mestverwerkers.

I agree to the competition rules.
